# Martin Dorazil

## Software Engineer

**About Me** I'm C/C++/C# programmer and musician, currently working for Craneballs company as C++ engine programmer and C# tool programmer. I'm creator of the Sandy Engine - procedural planet generator written in C++ and used in Planet Nomads sandbox game. I'm also interested in game engines and lower level modules used for game development. I enjoy programming in general, it's my hobby as well as music and guitar playing.

## Education

**2009 - 2013, Technical University of Ostrava**  
B.Sc. in Computer Science

## Experience

**2018 - present, Unity Developer + Project management, Virtual Forest - Craneballs**

Address

Ostrava, Czech Republic

## Software Development Skills

### Programming languages

- C
- C++
- bash
- C#
- Java
- GLSL

### Other Software & Tools

- Unity
- Linux
- XCode
- Vim/Emacs
- MacOS
- MS-DevOps
- OpenGL
- Android
- Pivotal

## Languages

- Czech
- English

## Interests

### Professional

Game engine programming, optimizations, game rendering, low level programming, software design and architecture.

### Personal

Music, guitar, chess.

## Soft skills

- Patient
- Teamwork
- Optimistic
- Self-motivated
- Teachable
